

Observation Unit

image & prompt

edited image pair

identity-conditioned image set

multi-view bundle

video or story sequence

Agreement Target

External
Consistency

Internal
Consistency

Normative
Consistency

Source of Evidence

MLLM/VQA-based
verification

Similarity /
matching signals

Learned evaluators /
reward models

Set-level or sequence-
level checks

Human judgments /
stress tests

Evaluation Outputs

semantic alignment

object, attribute,
relation, counting

identity persistence

same subject across
images or scenes

edit preservation

instruction following &
background/identity preservation

spatiotemporal
coherence

multi-view compatibility
temporal / narrative continuity

normative alignment

human preference alignment
physical validity...
